The event would not be successful without the support from our business colleagues. Your product portfolio provides a competitive edge in the market place and goods and services that are in demand in the market. The event is being organized with the following objectives:

- Promote, publicize and popularize European/Nepalese products, services and networking

- Promote & publicize business and investment opportunity in Nepal for the European companies
- Provide a forum for small and medium size companies to increase develop business contacts

This event will be the first of its kind for the Nepalese entrepreneurs to network, learn and share with their European counterpart. EEC-Nepal expects active business personnel, members from donor agencies, diplomatic community and general public to attend the program which includes networking and break-out sessions.

Over the last couple of years the response from the general public and business sectors has been overwhelming towards European products and services specially in the area of power generation, waste management, IT, hightech industries, agricultural cash crop, non-timber forest products and minerals.

In order to organize the event in a grand scale EEC-Nepal seeks the cooperation from all stakeholders ranging from importers/agents of European products, donor agencies and European consultants to participate at the said program.
